

cowCamTM

Portable barn surveillance for cattle owners

Quality assured and mobile surveillance solution with 800m wireless range. The camera in the barn and the LCD-monitor in your home provide security and complete supervision over your cattle and calving pen.

Night vision (10 m), wide angle lens, 800m range at a clear line of sight and trouble free installation makes the cowCam a favourite among cattle owners in Europe. Easy instructions included.

The complete surveillance solution that contains everything you need for mobile supervision of your cattle

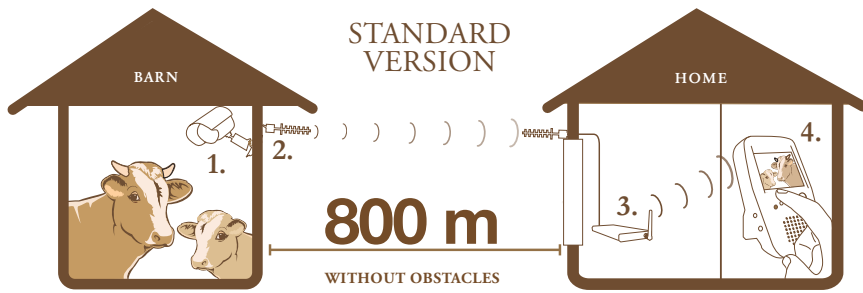

With the cowCamTM in the barn, you can supervise your calving pen from the comfort of your home.

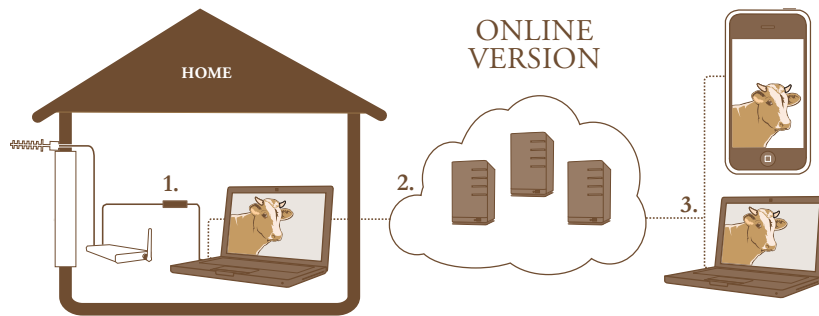

See your barn wherever you are with cowCam Online!

How it works:

Step by step:

1. The camera monitors your cattle, the signal is transmitted via the cable to the A300-antenna outside the barn.
2. The A300-antenna on the barn wall transmits the signal to the receiving A300-antenna.
3. The videoLink receives the signal from the receiving A300-antenna and then transmits it in your house for better picture quality.
4. The portable LCD-monitor receives the signal wirelessly from the videoLink and gives you a comfortable supervision of your cattle in your home.

Step by step:

1. The picture of your cattle goes from the videoLink to your computer through the USB-adaptor.
2. The picture of your cattle is effortlessly streamed from your computer through the Internet directly to cowCam Online. You don't have to worry about any technicalities such as firewalls or IP-configurations.
3. Safe and easy you see the picture of you cattle on www.cowcam-online.com on any other computer or in your cell phone wherever you are.
