

horseAlarmTM

Reliable horse monitoring alarm with double alarm sensors.

horseAlarm measures both sweating and how often your mare is lying down, two proven indicators of foaling or if the horse is not well. Monitor the state of your horse and compare current values with recent history. Adjust the sensitivity of the alarms and customise them to individually suit your horse. When the levels exceed the chosen limits the alarm will sound. horseAlarm is both easy to set up and easy to use. The receiver is portable so that it comfortably can be used wherever you are in your home.

horseAlarmTM provides safer horse keeping during foaling or colic.

horseAlarm is securely attached to your horse.

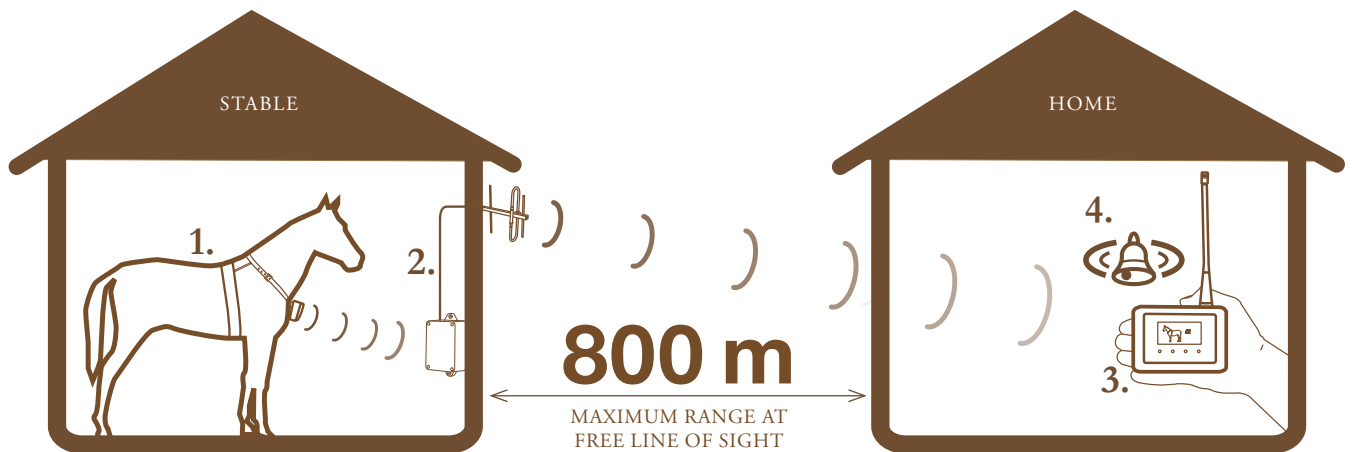

Monitor comfortably from your home.

For safer horse keeping and successful foaling.

How It Works:

Step by Step:

1. The sensors measure how much the horse is sweating and whether it is standing or lying down.
2. The information is sent from the sensors to the Repeater, which transmits the signal further through the R300-antenna.
3. The receiver receives the signal wirelessly and the values as well as recent history are shown on the LCD screen.
4. When the sensors on the horse register signs of foaling or colic, horseAlarm will alarm using both sound and visual indicators.

“horseAlarm provides extra security during foaling or colic”

Included:

- 1 Harness with built in sensors and transmitter (Operating temperature -20° till +50°C // IP66)
- 3 AAA-batteries for the sensor box (up to 6 months of battery life)
- 1 Repeater for retransmission of the signal to the home with optimal range
- 1 R300-antenna for 800 m of wireless range between stable and home (length of cable: 7 m)
- 1 Wireless portable receiver featuring LCD screen, alarm and history function
- 2 Power adapters for power supply in stable and home
- 1 Illustrated manual in English

- » Monitor up to eight horses simultaneously
- » Also measures the temperature in the stable

Perfect accessory to horseAlarm:

- » GSM Alarmer (calls up to 6 mobile phones when the horseAlarm is triggered)
